Hi Sarah,

I'm not sure that I understand what you are asking? Are you trying to separate Residential Consumer products from Professional/Ag products?

Maybe we should discuss?

L

Subject: Loose bait question

Rusty and Laura,

We made a decision to take out all rodenticides (from the pet slides) which don't have "commensal" uses. And then I'm not sure whether I need to take out the rodenticides that are not currently marketed with loose bait (I'll ask for clarification).

In the following table I'm pretty sure I keep the "green rows" in the slides, I take the "red rows" out, and I'm not sure about the light red/pink rows. But do I have the commensal/loose bait columns filled out correctly?

--	--	--	--

Rodenticide	Commensal (current)	Loose Bait (current)	Loose Bait (past)
Zinc phosphide	No	No	Yes
Diphacinone + its salt	Yes	No	Yes
Cholecalciferol	Yes	No	Yes
Chlorphacinone	Yes	No	Yes
Difenacoum	Yes	No	Yes
Brodifacoum	Yes	Yes	Yes
Bromadiolone	Yes	Yes	Yes
Bromethalin	Yes	Yes	Yes
Warfarin + its salt	Yes	Yes	Yes
Difethialone	Yes	Yes	Yes

Thank you!
Sarah
